

Mark Nimlos

Mark Nimlos - NECO Board

Mark Nimlos (the person, not the dog) joined the NECO board in 2017 and is leading the fundraising committee. He has helped write funding proposals to NECO sponsors and to foundations. He is particularly interested in expanding the reach of renewable energy, energy efficiency and sustainable living to groups that have traditionally been left behind and is believer of using our new energy future to help improve equity and inclusion.

Mark works as a researcher, project manager and group leader at the National Renewable Energy Laboratory (NREL) in Golden, Colorado, where he has been on the staff for over 30 years. His areas of expertise at NREL are biomass energy, renewable transportation fuels and biomass-based consumer products. He has also been involved in solar research and energy storage (batteries).

Mark received his Ph.D. in Chemical Physics from the University of Colorado in 1986 and has worked in Colorado since. He is a native of Montana and enjoys the outdoor activities Colorado has to offer (biking, skiing, trail running, fishing, hiking, etc.).
